## Cover Letter

January 17, 2024

Team Par Pacific,

I am writing to express my interest in the Sr. Network Engineer position at Par Pacific, as advertised. With over 8 years of experience in networking technologies, a robust history of driving innovation, and a proven ability to bridge the gap between technical solutions and business objectives, I am excited about the opportunity to contribute to your team.

In my previous role at Tetra Technologies, I played a crucial role in bridging the gap between infrastructure and the executive team. This was particularly important during a challenging phase when the company had significantly reduced its IT team by almost 90% due to COVID. Starting with a predominantly help desk team, I quickly diagnosed and resolved persistent infrastructure issues, eliminating daily outages within three weeks, and establishing a robust change management process for the infrastructure environment within a month. My manager recognized my efforts, stating, 'You have done more in 3 weeks than I've been trying to do in 3 years!'

With requirements for Cisco, Palo Alto, Velocloud, Meraki Wireless & AWS. I would be the perfect candidate as I have 8+ years of enterprise Cisco networking, I have 7+ years of SME experience in Velocloud, designing 1000s of Velocloud environments, Hub & Spoke, HA, Enhanced HA, Velocloud Gateway service injection like uCaaS and other voice services. I have created automation scripts for creation of multiple sites with a click of a button using Velocloud API from the VMware Developer portal. Since leaving Tetra in October, I took advantage of my time and recertified myself in Meraki products and design, completing 7+ courses via Meraki's partner portal.

My approach to challenges is unique: I embrace problems with an open mind and a rapid action plan, a mindset that has fueled all my successful endeavors. This, combined with my quick adaptability to new technologies, has been the cornerstone of my career. My commitment to continuous learning through platforms like Pluralsight, vendor learning portals, and various certifications, reflects my relentless pursuit of professional growth and keeping pace with emerging technologies.

I'm eager to bring my comprehensive skill set, dedication to continuous improvement, and strategic vision to your team. I am confident in my ability to contribute to innovative solutions and drive the growth of your network infrastructure, leveraging every opportunity to deepen my knowledge and expertise.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with Par Pacific's goals & to contribute to the innovative projects at your company.

Best regards,

Jordan V. Levinson
